OPT IT

CASE STUDY

Strengthening Trust and Security for a Cloud-Based Platform

A Retail SaaS Tech organization achieved improved endpoint compliance and audit readiness with OPT IT Technologies.

Challenge

Operating in a highly regulated environment, the client faced growing pressure to maintain strong security controls while supporting business continuity and scalability.

- Managing security risks across cloud and endpoint environments

- Ensuring consistent OS patch compliance across devices

- Strengthening controls to meet regulatory and audit requirements

- Reducing operational risk without disrupting day-to-day business operations.

Overview

The client is a leading retail Saas Tech organization delivering digital services through a cloud-based platform. The company manages large volumes of sensitive financial data, including customer information, transaction records, and regulatory data making security,compliance, and reliability of business-critical priorities.

Solution

OPT IT Technologies implemented a proactive security and endpoint management strategy focused on visibility, automation, and continuous compliance.

Key solution components included:

- Centralized endpoint and OS patch management using JumpCloud.

- Continuous monitoring of device compliance and remediation status.

- Integrated endpoint protection with Sophos during patching cycles.

- Ongoing security governance aligned with Fintech regulatory standards.

Result

- Achieved 93.5% OS compliance across 391 actively managed devices
- Reduced manual patching efforts through automation
- Maintained continuous endpoint protection during remediation activities
- Improved audit readiness and customer confidence.

Ongoing Impact

With OPT IT Technologies' continued security support, the retail Saas Tech organization has:

- Strengthened its overall security and risk management posture

- Reduced exposure to known vulnerabilities

- Established a scalable framework for continuous compliance and future growth.

> *OPT IT supported our company with reliable IT support and infrastructure services.They have a highly diligent and professional team, who have never shied away from going beyond the role to execute on the charter.
